

CALL FOR PAPERS

ACM Transactions on Computational Logic

For Logic in Computer Science

Information For Contributors

ACM Transactions on Computational Logic (TOCL) welcomes submissions related to all aspects of logic as it pertains to topics in computer science. Logic plays an important role in computer science and has permeated several of its areas, including artificial intelligence, computational complexity, database systems, verification, and programming languages.

TOCL has become the standard reference in the field, publishing high-quality submissions in all areas of computational logic. Both theoretical and applied papers are welcome for submission, as well as submissions showing novel use of logic in computer science.

Among the topics within the scope of TOCL are the following:

- automata theory
- automated deduction
- categorical models and logics
- concurrency and distributed computation
- constraint programming
- constructive mathematics
- database theory
- decision procedures
- description logics
- domain theory
- finite model theory
- formal aspects of program analysis
- formal methods
- foundations of computability
- games and logic
- higher-order logic
- lambda and combinatory calculi
- linear logic, logic in artificial intelligence
- logic programming
- logical aspects of bioinformatics
- logical aspects of computational complexity
- logical aspects of quantum computation
- logical frameworks
- logics of programs
- modal and temporal logics
- model checking
- probabilistic systems
- process calculi
- programming language semantics
- proof theory
- real-time systems
- reasoning about security and privacy
- rewriting
- type systems and type theory, and verification

Editor-in-Chief

Orna Kupferman, The Hebrew University, Israel

Associate Editors:

Albert Atserias, Universitat Politècnica de Catalunya, Spain
Christel Baier, Technische Universität Dresden, Germany
Chitta Baral, Ira A. Fulton School of Engineering, United States
Meghyn Bienvenu, CNRS & University of Bordeaux, France
Samuel R. Buss, University of California, San Diego, United States
Anuj Dawar, University of Cambridge, United Kingdom
Frank de Boer, Centrum Wiskunde & Informatica (CWI), Netherlands
Danny De Schreye, Katholieke Universiteit Leuven, Belgium
Stéphanie Delaune, Université de Rennes, CNRS, IRISA, France
Jürgen Giesl, RWTH Aachen University, Germany
Valentin Goranko, Stockholm University, Sweden
Thomas Lukasiewicz, University of Oxford, United Kingdom
Stephen Muggleton, Imperial College of Science, United Kingdom
Tobias Nipkow, Technische Universität München, Germany
Leszek Pacholski, University of Wrocław, Poland
Brigitte Pientka, McGill University, Canada
R. Ramanujam, Institute of Mathematical Sciences, India
Simona Ronchi Della Rocca, University of Torino, Italy
Lenhart K. Schubert, University of Rochester, United States
Scott A. Smolka, State University of New York at Stony Brook, United States
V.S. Subrahmanian, University of Maryland, United States
Alwen Tiu, Australian National University, Australia
Pascal Van Hentenryck, The University of Melbourne, Australia
Victor Vianu, University of California, San Diego, United States
Mahesh Viswanathan, University of Illinois at Urbana-Champaign, Germany
Heribert Vollmer, Leibniz Universität Hannover, Germany

The ACM Digital Library (DL) is the most comprehensive collection of full-text articles and bibliographic records in existence today covering the fields of computing and information technology. The full-text database includes the complete collection of ACM's publications, including journals, conference proceedings, magazines, newsletters, and multimedia titles.
